

Microsoft 365

Vodafone Albania

What is Microsoft 365?

Microsoft 365 represents a suite of programs, based on the Cloud, which enable users and companies to carry out activities in a professional and simple way, facilitating interaction between teams and providing a high level of security.

Collaboration

Exchange e-mails, calendars, contacts and edit documents in real time through collaborative programs.

Business Continuity

No matter what happens to your physical devices, your email, files and data are safely stored in the Cloud. Access data securely and work from anywhere.

Simple

All essential applications such as Word, Excel and Outlook are included and run online without the need to install additional programs.

Stay innovative

With M365 it provides the right tools to drive innovation
Organize online meetings
Keep electronic records
Record or transcribe the conversation in different languages.

 Microsoft 365

Why M365?

Manage your IT effectively

With M365 you don't need local servers, infrastructure and support. You can meet the demands of your staff and at the same time reduce the demand for additional resources and physical equipment.

Take the office with you

M365 offers apps that are always accessible and updated. Wherever you are, at your desk or on the go, you can get what you need, when and where you need it.

Don't lose anything

Set up online meetings with Outlook integration or by sending custom links to join more easily.

Emphasize communication

Your emails are more distinctive when you create a custom format and have more impact when you include images.

Always updated

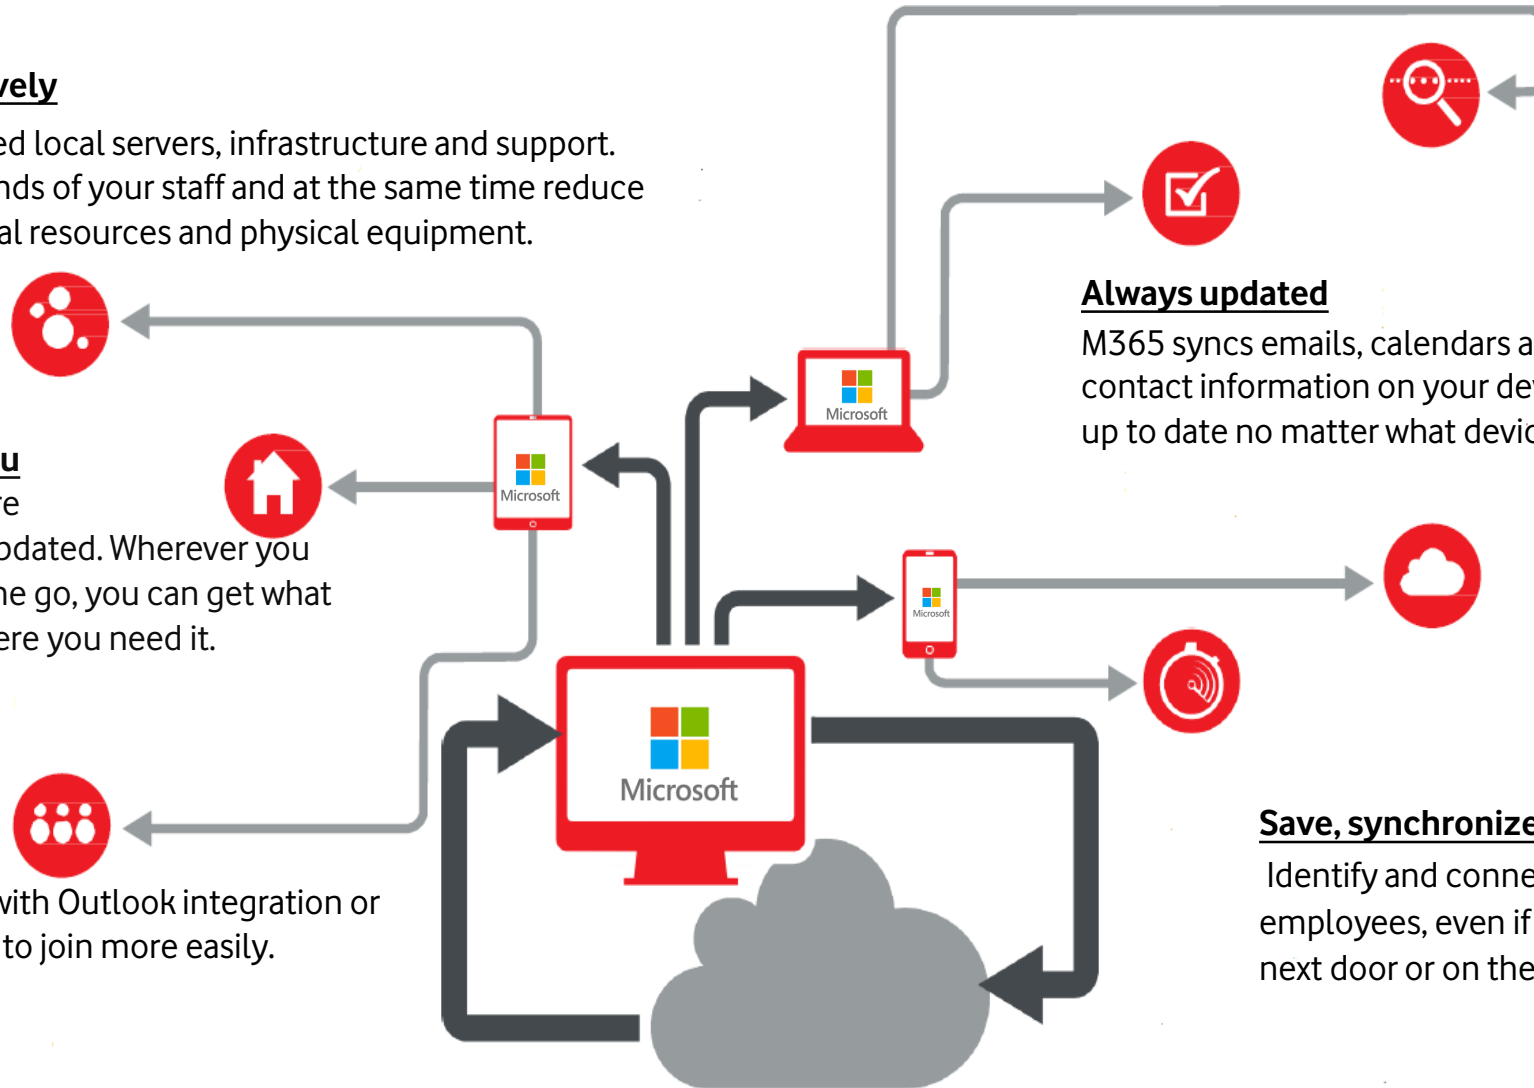

M365 syncs emails, calendars and contact information on your devices in real time. So it's up to date no matter what device you have in hand.

Find the right people

Easily identify colleagues who are online and interact with them instantly

Save, synchronize and share files

Identify and connect very quickly with your employees, even if they are in the office next door or on the move.
